PARCEL POST RATE  
REDUCTION URGED

(Continued from page 1)

postoffice department's recommendation that the postage rate on second class mail be increased from one cent to two cents a pound. In the opinion of the postmaster general favorable action by congress on the report of the commission would be a step towards the proper adjustment of postal charges.

"There is a widespread popular interest," the report says, "in the plan to lower the postage charges on letters from 2 cents to 1 cent an ounce. The proposed increase in the second class rate would pave the way for this change, making it possible to reduce the first class rate without departing from the present policy of a self-supporting postal service."

## AN EARLY EASTER

Easter Sunday for 1913 will happen on March 23. A writer in the St. Louis Post Dispatch says:

Easter bonnets will blossom earlier this year than they have since 1850 and earlier than they will burst into bloom for another century. The earliest date on which Easter can fall is March 22, but that hasn't happened since 1818. This year it will be March 23, the same date on which it fell in 1856 and 1845. The Rev. Father S. Martin Brennan, a noted St. Louis astronomer, told a Post-Dispatch reporter that tables computed by mathematicians have not been carried far enough to show how long it will be before Easter again falls

on so early a date, but it will not occur again until sometime after the year 2000.

The rule for fixing the date of Easter originally was that it was the Sunday after the first full moon following the spring equinox. The equinox falls on March 21. According to a ruling of the council at Nice in March 21 is a Saturday and there is a full moon on that day the following day will be Easter. This year March 21 will be Friday and there will be a full moon Saturday.
